

RXMOD-W1

RX3000 Water Level Sensor Module

The RX3000 Water Level Sensor Module (RXMOD-W1) offers users the ability to monitor water level, pressure, and temperature, as well as barometric pressure, with the HOBO RX3000 Remote Monitoring Station. It is configured through HOBOLink, Onset's cloud-based software. For water level applications, a HOBO RX3000 station, water level sensor cable (CABLE-RWLMOD-XXX), and water level sensor (MX2001-0X-S or MX2001-0X-Ti-S) are required.

Supported Measurements:

Barometric Pressure, Differential Pressure, Water Flow, Water Level and Water Temperature

Key Advantages:

- Integrated barometric pressure sensor
- Plug-and-play remote water level and flow monitoring

* Water Level Accuracy: With accurate reference water level measurement, known water density, and a stable temperature environment.

** Raw Pressure Accuracy: Absolute pressure sensor accuracy includes all sensor drift, temperature, and hysteresis-induced errors.

*** Changes in Temperature: Allow 20 minutes in water to achieve full temperature compensation of the pressure sensor. There can be up to 0.5% of additional error due to rapid temperature changes.

Measurement accuracy also depends on temperature response time.
