Standard, Pro & Enterprise

Standard, Pro and Enterprise accounts

The SAClient Portal is constantly updated with great new features. To keep things clear, the SAClient Portal has been divided into three different accounts: Standard, Pro and Enterprise. In the first instance everyone has a Standard account. The Pro and Enterprise accounts have been added. In this document you will find an answer to the following questions:

- What exactly is the difference between a Standard, Pro and Enterprise account?
- What are the prices of a Standard, Pro and Enterprise account?
- How can I upgrade to a Pro or Enterprise account?

The difference between the Standard, Pro and Enterprise account

To learn more about the differences, please read the following page.

## The prices of a Standard, Pro and Enterprise account

Credits are required to pay for usage of the SenseAnywhere portal, the storage of the data of your dataloggers and optionally sending SMS notifications. Credits can be bought via Cards or Codes.

- For a Standard account you pay 1 Credit per data logger per year.
- For a Pro account you pay 1,5 Credits per data logger per year.
- For an Enterprise account you pay 2 Credits per data logger per year.

Upgrade to a Pro or Enterprise account

Please see Help > Subscriptions for more information. If you want to upgrade your subscription, go to Management > Credits. Only SuperAdmins can upgrade the account and there must be sufficient Credits available to upgrade.
